

SUMMARY

Passionate Data Scientist, dedicated to leveraging analytical and Machine Learning expertise to address practical challenges.

EXPERIENCE

Teacher *St.Francis Xavier Higher Secondary School 2018 - 2020*

-

PROJECTS

- **Heart Disease Prediction**
Predicting heart disease to identify individuals who are at risk of developing cardiovascular problems in the future.
- **Diabetes Risk Prediction**
Developed a machine learning model to predict diabetes risk using clinical and lifestyle data.
- **Android-Malware-Prediction**
Employed machine learning techniques to develop a model for the early detection of Android malware.
- **Customer Conversion Prediction**
Developed a machine learning project aimed at forecasting customer conversion rates in marketing campaigns.
- **HR Employee distribution analysis**
Designed and implemented an HR employee distribution project using SQL and Power BI tools.
- **YouTube data harvesting and warehousing**
Extract YouTube channel data using the channel ID and store it in MongoDB.
- **IMDB movie review sentiment analysis**
Creating an NLP-based project aimed at developing an IMDb movie review sentiment analysis model.
- **Extracting Business Card Data**
Leverage Python's easyOCR along with pandas, numpy, and SQL queries to extract and store crucial data from business cards into a MySQL Database.

SKILLS

- Python
- SQL
- Pandas
- NumPy
- Matplotlib
- Plotly
- Power BI
- MySQL
- MongoDB
- Scikit-learn
- Jupiter Notebook
- Google Colab
